Company Credibility Report

Company name	Shenzhen Bioeasy Biotechnology Co., Ltd.
Report generation date	2020/5/27 11:36:27

(The content of this report is for guidance only, for more details, please consult the search page of the National Enterprise Credit Information Publicity System.)

Public information

Information of commercial license

Unified Social Credit Code: 914403006641998843

Company name: Shenzhen Bioeasy Biotechnology Co., Ltd.

Category: Other corporations (unlisted)

Legal representative : Zhu Hai

Registered capital: 3,600,000,000,000,000 RMB

Establishment date: 24/07/2007

Open for business since: 24/07/2007

Open for business until:

Registration authority: Shenzhen Municipal Market Supervision and Administration Bureau

Review date: 11/10/2019

Registration status: Existence (in operation of normal economic activities and in registration)

Address: Bioeasy Building (whole building), Liuxian 1st Road, Xin'an Sub-District, Baoan District, Shenzhen, Guangdong Province, China

Business scope: The general business lines are: Technological development of biological products; sale of laboratory equipments and medical instruments of Category 1; sale of motor vehicles; sale of fast testing vehicles; design and construction of cleaning projects, laboratory projects, construction and decoration projects and mechanical and electrical projects; technical development, wholesale and retail of software; food safety consulting; import and export of national business, goods and technology. (Except projects that, according the laws, regulations and decisions of the State Council, require previous approval before registration), the allowed business lines are: development, manufacture and sale of rapid tests and equipments of food safety (except medical products and other projects with limitations); R&D, manufacture and sale of in vitro diagnostic tests; R&D, manufacture and sale of animal diagnostic products; manufacture and sale of veterinary medicine (with certificates of permits and within the approved period); R&D, manufacture and sale of laboratory analysis equipments; food safety tests; catering services (internal employees' canteen).

No.	permits number	permits name	Valid from	Valid until	Issued institution	permits content
6	深环宝批【2020】223号	Approval of construction project environmental impacts evaluation review		31/12/2019	Bao'an Ecology and Environment Bureau, Shenzhen	<p>According to <Law of Environmental Impacts Evaluation of the People Republic of China>, <Regulation of Construction Projects Environment Protection Management> and other related laws and regulations, and after the investigation and review of the <Application of Environmental Impacts of Construction Projects Evaluation> No. 20204 4030600124 and its attachments presented by your company, this office approve your project of "Food Safety Fast Tests Manufacture Line Construction Project" located in Xin Zheng Industrial Park, Plant B, 1-4 floor, Xin'an Sub-district, Bao'an District, Shenzhen; meanwhile, the following rules must be followed:</p> <ol style="list-style-type: none"> 1. The name of this project is "Food Safety Fast Tests Manufacture Line Construction Project" and its main activity is the manufacture of products such as colloid test paper, ELSA reagent test kits, equipments, physical and chemical reagents, antigens and antibodies, etc; the antigens and antibodies are used for food safety fast tests reagents production, there is no laboratories of level P3, P4 biological security, nor GM laboratories, it does not carry microbiological or chemical experiments for diseases, as well as any experiments for medical treatment, nor do the work of medical treatment. 2. It is prohibited to use materials that contain highly volatile organic compounds. 3. The discharge of domestic wastewater from the project must meet the requirements of the second time slot and level 3 of the local standard of Guangdong province according to <Limit of discharge of water contaminants> (DB44 / 26-2001), the wastewater must first run through a septic tank then into in-depth processing in the water purification factory after meeting the pre-processing requirements. 4. The emission of organic residual gas from the project must follow the standard of time slot II for non-main

industries of the <Volatile Organic Compounds Emission Standard, session 7: other industries> (DB37 / 2801.7-2019); the rest of the exhaust gas emission must comply with the time zone II standard of <Limits of Emission of Pollutant Residues to the Atmosphere> (DB44 / 27-2001) of the local administration of the province of Guangdong. If the height of the exhaust pipe is not at least 5m higher than the tallest building within a radius of 200m, the emission rate must be reduced to the 50% of the maximum value.

5. The project noise emission must reach the third category zone standard according to GB12348-2008, ≤65 dB during the day and ≤55 during the night.
6. This project does not involve production and discharge of heavy metals, sulfur oxide or nitrogen oxide.
7. The industrial wastewater from this project must be discharged after being processed with facilities equipped for the "Food Safety Fast Tests Manufacture Line Construction Project" by Shenzhen Bioeasy Biotechnology Co, Ltd. The production wastewater must reach the third Category standard of < Water Pollutant Discharge Limit> (DB44 / 26—2001) of Guangdong Province and follow the strictest value of water purification factory.
8. The control index of the total emission of volatile organic compounds of this project is 26,62kg/a.
9. This project does not have a radioactive source nor does it involve the production of radioactive substances.
10. It is forbidden to mix and eliminate solid industrial waste with other household waste, the treatment of dangerous industrial waste must be entrusted to authorized entities and carried out according to related regulations, the contracts of said management must be registered in this institution.
11. Strictly follow the environmental protection regulations of "3 duties at the same time", the project must be equipped with construction pollution prevention facilities for exhaust gas during its operation, and issue relevant exhaust gas treatment permit certificates according to the regulations of <Polluting Source Discharge permits Management Rules>.

No.	permits number	permits name	Valid from	Valid until	Issued institution	permits content
7	深环宝批【2020】224号	Approval of construction project environmental impacts evaluation review		31/12/2019	Bao'an Ecology and Environment Bureau, Shenzhen	<p>According to <Law of Environmental Impacts Evaluation of the People Republic of China>, <Regulation of Construction Projects Environment Protection Management> and other related laws and regulations, and after the investigation and review of the <Application of Environmental Impacts of Construction Projects Evaluation> No. 202044030600124 and its attachments presented by your company, this office approve your project of "Pre-certificate of Manufacture of WHO Construction Project" located in Xin Zheng Industrial Park, Plant B, floor 5-6, Xin'an Sub-district, Bao'an District, Shenzhen; meanwhile, the following rules must be followed:</p> <ol style="list-style-type: none"> 1. The name of this project is "Pre-certificate of Manufacture of WHO Construction Project" and its main activity is the manufacture of clinical diagnostic tests, the main techniques are preparation of pads and reaction vessels, preparation of antigen/antibody coating, assembly of test paper, cutting, packaging and shipping. 2. It is prohibited to use materials that contain highly volatile organic compounds. 3. The discharge of domestic wastewater from the project must meet the requirements of the second time slot and level 3 of the local standard of Guangdong province according to <Limit of discharge of water contaminants> (DB44 / 26-2001), the wastewater must first run through a septic tank then into in-depth processing in the water purification factory after meeting the pre-processing requirements. 4. The project noise emission must reach the third category zone standard according to GB12348-2008, ≤65 dB during the day and ≤55 during the night. 5. This project does not involve production and discharge of heavy metals, sulfur oxide or nitrogen oxide. 6. The industrial wastewater from this project must be discharged after being processed with facilities equipped for the "Food Safety Fast Tests Manufacture Line Construction Project" by Shenzhen Bioeasy Biotechnology Co, Ltd. The production wastewater must reach the third Category standard of <Water Pollutant Discharge Limit> (DB44 / 26—2001) of Guangdong Province and follow the strictest value

- of water purification factory.
7. This project does not involve the production and emission of non-volatile organic compounds.
 8. This project does not have a radioactive source nor does it involve the production of radioactive substances.
 9. It is forbidden to mix and eliminate solid industrial waste with other household waste, the treatment of dangerous industrial waste must be entrusted to authorized entities and carried out according to related regulations, the contracts of said management must be registered in this institution.
 10. Strictly follow the environmental protection regulations of "3 duties at the same time", the project must be equipped with construction pollution prevention facilities for exhaust gas during its operation, and issue relevant exhaust gas treatment permit certificates according to the regulations of <Polluting Source Discharge permits Management Rules>.
 11. Before the the production and function of the main work, the construction entity must organize and initiate the acceptance of completion of the environmental protection facilities according to the corresponding laws and regulations; it cannot enter production without having previously approved the acceptance.
 12. All articles of the environmental impact report must be carried out point by point.
 13. If there were alterations on the nature, scale, location, used techniques or measures to prevent contamination and destruction of the environment, those must be reapplied by means of an environmental impact evaluation request document.
 14. This reply and its annexes are legal documents of the environmental protection review of the issued project. If the initiation of the project begins after 5 years from the day of the reply, you must apply your review again to this institution.
 15. This project must strictly comply with the corresponding environmental protection laws.
